

HARDWARE & COMPONENTS LOCKSETS

TRILENNIUM™ Multi-Point Locking System

Security. Strength. Reliability. Performance.

Unmatched protection doesn't have to mean compromised style. Trilennium offers a growing portfolio of attractive handset designs that features one solid unit with three latches based on the strength of patented I-Beam construction for reliable, proven strength and performance. Operating as one unit, all three latches engage when the door is closed. With one movement of the thumbturn or key activates all three deadbolts. Each latch is a deadbolt and adds high-performance security.

- All **BHI Door** units use stainless steel mechanisms and strikes
- Patented Strike Rollers and latches draw the door panel into perfect alignment with the jamb for a tight seal with no deflection
- A single downward turn of the interior handle releases all three deadbolts makes this panic proof
- Keying available
- Manufactured in the USA
