PLASTPRO PF™ FRAMES

PLASTPRO PF™ FRAME
*with HydroShield Technology™

WOOD FRAME

PF™ Frames from Plastpro, Inc. are an innovative new alternative to traditional wood door jambs. After extensive research and development, Plastpro has formulated a poly-fiber doorframe system that combines all the strength and convenience of wood with enhanced properties that make it moisture, rot, and insect resistant. This unique formulation means that Plastpro's PF™ Frames will not absorb or wick moisture and will never warp, splinter, or rot. And the advanced PF™ Frame system can be machined the same way as traditional wood jambs with no added hassles. Plastpro's PF™ Frames guarantee a long-lasting, rot-free entryway that will maintain its integrity today, tomorrow, as well as years down the road.
