

THE DOOR OF BEAUTY & INNOVATION

ABOUT PLASTPRO

We choose a door for its aesthetic qualities, but doors offer so much more than a cohesive look for our houses. Our front doors are the gateway to our homes, a warm place to welcome guests and loved ones. Our front door ushers us into the start of our day and welcomes us back to our homes and families at the end of the day. Doors aren't just doors; they reflect our style and they offer protection for the people that matter most. We want you to choose a door that best represents you, makes you feel secure, and fits your needs.

Since 1994, Plastpro has focused on providing a superior product with the best value, technology, and commitment to our customers. Wood and steel doors were historically preferred in the industry, but both come with long-term problems, such as rotting, rusting, and weather damage. Our fiberglass doors are the best solution for these longevity issues. They are not susceptible to weather damage, require less maintenance, and offer higher performance ratings. We've introduced the first door with composite stiles and rails, HydroShield Technology, and composite Polyfiber (PF) Frames to the industry. Our doors feature a full length LVL block that provides stronger rigidity and a range of door locks and hardware to be installed for increased security. We carry a wide variety of designs, sizes, and styles to elevate any home.

From the beginning, we've been committed to providing superior products and to creating opportunities. Our goal is to create positive change for our employees, customers, and our community. We believe in doing good for the world and making a difference. For us, success is only as good as the good it creates. We've continuously partnered with Habitat for Humanity in order to create affordable, green houses for low-income families across the nation. We've donated more than 500 doors to various chapters of Habitat for Humanity and other non-profit organizations. With a Plastpro door, you not only acquire a beautiful door with the best quality, you become part of Plastpro and join us in giving back to others.

PATENTED HYDROSHIELD™ TECHNOLOGY

Our exclusive HydroShield Technology protects our doors against moisture and humidity infiltration by creating a fully composite barrier that encases and protects the door on all six sides. It prevents warping, delamination, corrosion, rotting, and the buildup of mold and mildew. When paired with our Polyfiber (PF) Door Frames, our doors with HydroShield Technology create an impenetrable entryway.

1 FIBERGLASS REINFORCED DOOR SKINS

Our exclusive formula is measured precisely to ensure each skin is produced to the highest quality. With unlimited design options, customized panel configurations are possible. The skins require little maintenance and will not splinter, dent, warp, rot, or rust. They can be painted or stained, and we provide a variety of graining options.

2 FULL LENGTH COMPOSITE STILES

Our full-length composite stiles protect the door from external moisture to prevent warping or rotting. They have twice the screw-holding strength of wood.

3 COMPOSITE TOP & BOTTOM RAILS

High strength composite top and bottom rails prevent moisture from seeping into the door and stop the buildup of mold.

4 EXTENDED LOCKBLOCK

Plastpro's full length LVL allows any type of lock to be placed for increased security. Our 8'0 doors have a steel bar in addition to the LVL to help increase the structure's rigidity.

5 POLYURETHANE FOAM CORE

Our advanced CFC-free, high density, Polyurethane foam core enhances the door's soundproofing capabilities and provides insulation up to six times greater than wood doors.

BACKED BY WARRANTY

We are proud to offer one of the best warranties in the industry. Plastpro products are held to high standards. We stand behind our products and guarantee the best quality to meet your performance expectations.

PFT™ DOOR FRAMES

To have a complete entry system, it is important to consider the material of the door frame. Many doors are hung in either wood or steel frames, which are prone to the same problems as the doors themselves. Wood frames can warp, rot, and crack, while steel frames can rust and dent. You don't want to install a door that will fail, nor do you want to install a frame that will fail.

Plastpro's Polyfiber (PF) Door Frames offer an innovative new alternative to traditional door jambs. Our uniquely formulated door frame combines the beauty of wood with the strength of steel. The material is durable, long-lasting, and is more thermally resistant than either wood or metal. The advanced system can be installed the same way as traditional wood jambs with no added hassles. When a fiberglass door is used with a PF Frame, they create an impenetrable entryway.

FEATURES & BENEFITS

- Equipped with HydroShield Technology, it will not absorb or wick moisture, and prevents warping, rotting, and splitting.
- Frame cannot be infested with termites at any point along the structure.
- Has twice the screw holding power of traditional wood door frames.
- More versatility in design. Available in various lengths and widths that can be stained as well as painted.
- Maintenance free and energy efficient.
- Continuous piece with no finger joint and is 25 percent more rigid than wood frames.

LIMITED SERIES

Our Limited Series was specifically selected to showcase some of the richest, most luxurious graining available.

MODERN SERIES

The Modern Series effortlessly makes a contemporary design simpler.

CRAFTSMAN SERIES

The Craftsman Series pulls design inspiration from 20th century architecture, for simple, classic statement doors.

RUSTIC SERIES

Our Rustic Doors were designed to provide classic charm, while bringing traditional, upscale appeal to any home.

MAHOGANY SERIES

The Mahogany Series brings a beloved wood texture into traditional, timeless styles.

OAK SERIES

Dressed in a rich, oak grain texture, our Oak Grain Series gives your home a classic look.

SMOOTH SERIES

The Smooth Series is made with a pre-pigmented white skin. Its simplicity gives a clean, minimal look to any of our fiberglass doors.

WHITE OAK SERIES

The White Oak Series combines the best features from our Smooth and Oak Grain doors. Any home can enjoy a rich, oak texture in a pre-pigmented white skin.

ONELITE SERIES

Our Onelite Series features a fine, flush glazed glass with a removable stop to allow the glass to be switched without changing the entire door.

NOVA SERIES

The Nova series features glass that is directly glazed into the door to create a seamless blend between the glass and door, allowing the greatest amount of views and light into your home.

CHOOSING YOUR DOOR SYSTEM

STEP 1: CHOOSE DOOR TYPE & PANELING

LIMITED

MODERN

CRAFTSMAN

RUSTIC

MAHOGANY

OAK

SMOOTH

WHITE OAK

ONELITE

NOVA

STEP 2: CHOOSE YOUR GLASS

STEP 3: CUSTOMIZE YOUR ENTRY SYSTEM

With so many choices on the market, selecting your ideal entry door can be a challenge. Plastpro has simplified this process to allow you to select your door in four easy steps: choosing the door type and paneling, choosing the decorative glass, customizing your entry system, and choosing the finish.

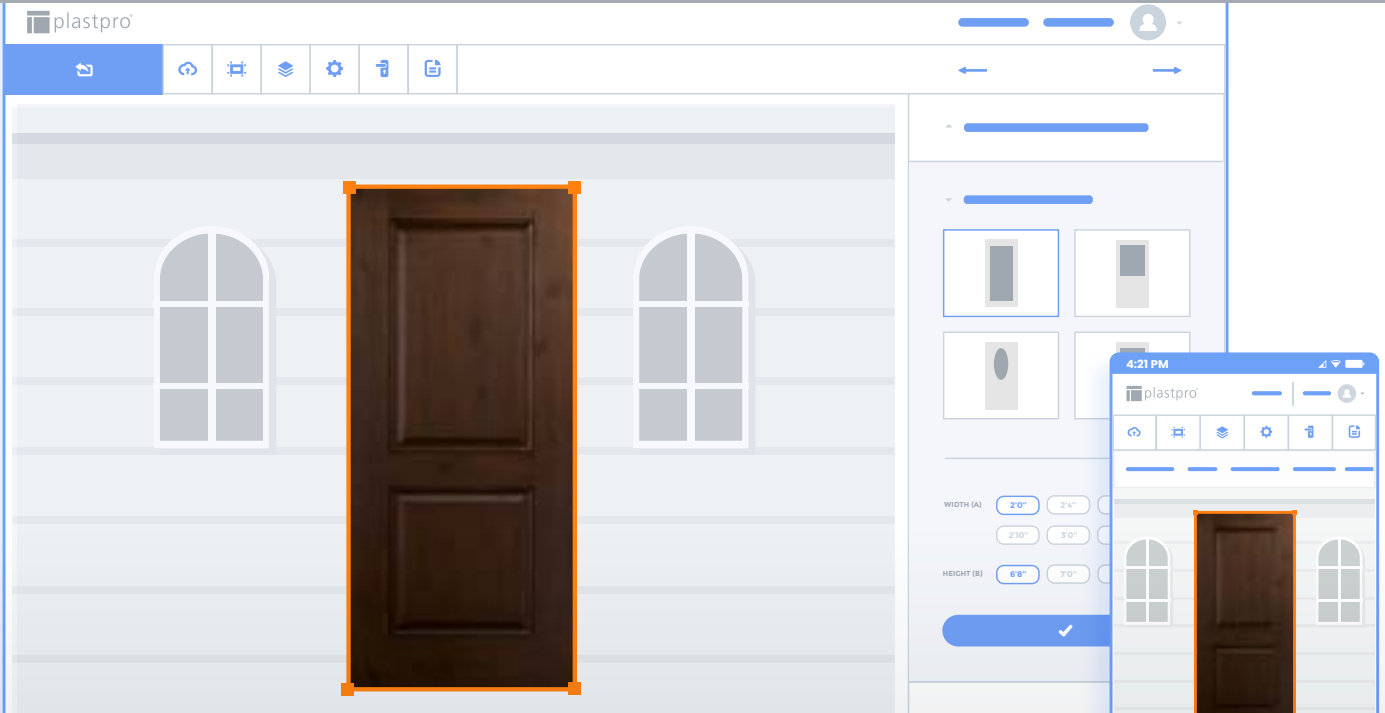

STEP 4: CHOOSE FINISH

Plastpro's Stain Kit contains everything you need to stain one prehung door and two sidelites, or one double door unit. Please visit our website for more details.

CHOOSE YOUR DOOR DIGITALLY

Sometimes it's hard to imagine how a door will look on your home. Our Doorability tool takes the guesswork out and lets you see our doors on your home. We have designed a tool that allows you to upload a photo of your home and instantly add a variety of door and glass options to visualize your home's new door.

CUSTOMIZE YOUR DREAM ENTRY WAY AT doorability.plastproinc.com

- EASY TO USE
- VISUALIZE THE PERFECT DOOR ON YOUR HOME
- SAVE AND EMAIL YOUR CUSTOM DOOR
- DRAW IN YOUR OPENING FOR AN ACCURATE VISUALIZATION

FIRE RATED

Made with fire-resistant composite, Plastpro's Fire Rated doors are extremely durable. Our doors are tested and comply with safety and performance standards to withstand fire for a minimum of 20 minutes. Certain models are available to hold off fire for 60 and 90 minutes. Most importantly, our doors provide a safe home without ever sacrificing style.

Contact us for stock availability.

TRIMMABLE

Our Trimmable Series is designed to fit in a variety of existing entry ways. Adjustments up to 2" in height and width can be made to the door through your contractor. Trimmable doors are available in Oak and Smooth skin. This is the door your home has been waiting for.

= Trimmable Option Available. Contact us for stock availability.
(Only available in 3'0" width)

HVHZ IMPACT

Plastpro's High Velocity Hurricane Zone (HVHZ) Impact Doors are engineered to withstand the force of flying objects, while maintaining all the benefits and beauty of our door aesthetic. Our Impact Doors are created, tested, and certified to meet the most stringent wind and impact code requirements in the nation. Our innovative R&D Department has pioneered a unique patent-pending process whereby a missile-proof shield is built-in to reinforce the door. Our Impact Series is designed to provide protection for your home from weather damages and peace of mind for you and your loved ones.

= HVHZ Option Available. Contact us for stock availability.

RESIDENTIAL ADA

Our Residential ADA doors are offered in a variety of styles that fulfill all compliances. From Modern to True White Oak, our Residential ADA series has a 10" bottom rail that allows a kick plate to be installed. We have the option to include reinforced blocking through a special order.

= Residential ADA Option Available. Contact us for stock availability.

DOORLITE OVERVIEW

A beautifully designed entryway helps set the stage for the rest of the home and creates a welcoming passage from public space to private abode. Nothing accomplishes that better than our exclusive glass designs that improve the look and value of your home while adding beauty to your everyday living.

Our doorlites are composed of a piece of decorative glass sealed between two pieces of tempered safety glasses, that provide excellent safety, sound, and thermal performance. The state-of-the-art Warm Edge spacer system provides a seal that protects and insulates your door & home for years to come. Unlike the competition, our metal caming includes a gasket that cushions & protects the glass from chipping, cracking, and rattling during door movement.

DOORLITE

INSULATING SYSTEM

All Plastpro Decorative Doorlites are made with Super Spacer® Cushion Edge™, a flexible, U-shaped, silicone foam tape product used to wrap around and cushion our center decorative panel. Featuring a vapor barrier backing, the product used in combination with Hot Melt butyl, provides a superior Warm-Edge seal.

PERFORMANCE FEATURES

- Warm-Edge Benefits: Superior silicone foam insulation, low thermal conductivity
- Silicon Foam Features: Excellent UV resistance and extreme temperature performance
- Dual-Seal Performance: Chamfered corners for increased sealant depth
- Tempered Safety Glass for your peace of mind

Our exclusive glass designs are offered with different caming options to match a variety of hardware finishes.

 WROUGHT IRON

 PATINA

 ZINC

CAMELIA

CAMING: WROUGHT IRON
TRANSOM: AVAILABLE

Camelia's wrought iron curves create symmetry, uniformity, and a sense of balance to a door's appearance. Against a waterfall textured background, the design gives the exterior of your home a modern and sophisticated charm, while delivering the ultimate level of privacy.

- 1 Wrought Iron
- 2 Waterfall Tempered Glass

PRIVACY RATING
INCREASING OBSCURITY

PRISCILLA

CAMING: WROUGHT IRON
TRANSOM: AVAILABLE

Priscilla's smooth swirl design pays tribute to Renaissance style. The wrought iron and little bubble glass give the design a touch of grandeur, which is perfect for adding elegant flair to any home.

- 1 Wrought Iron
- 2 Little Bubble Tempered Glass

PRIVACY RATING
INCREASING OBSCURITY

ABERDEEN

CAMING: ZINC
TRANSOM: AVAILABLE

There is more than meets the eye. Although simple in design, Aberdeen gives a modern, clean profile and its translucent reed glass is perfect for maintaining a high level of privacy.

- 1 Zinc Caming
- 2 Reed Glass

PRIVACY RATING
INCREASING OBSCURITY

ARTESANO

CAMING: PATINA
TRANSOM: AVAILABLE

Artesano's subtle hint of amber colored glass creates a warm, welcoming feeling for any home. This arrangement is the ideal balance of a clear, simple pattern and an artful combination of glass textures.

- 1 Clear Hammer (100HS)
- 2 Patina Caming
- 3 Amber Glass
- 4 Sea Spray
- 5 Clear Bevel

PRIVACY RATING
INCREASING OBSCURITY

ARTESANO BREEZE

CAMING: ZINC
TRANSOM: AVAILABLE

Artesano's classic design is a tasteful blend of small and large geometric shapes. This pattern's transparent features work to create a sophisticated, decorative, and elegant look to any entry door.

- 1 Clear Hammer (100HS)
- 2 Zinc Caming
- 3 Clear Bevel
- 4 Sea Spray

BRENTWOOD

CAMING: ZINC OR PATINA
TRANSOM: AVAILABLE

A classic inspired arrangement, our Brentwood piece epitomizes style. With bevel swirls and a bold centerpiece, all outlined by a crystal granite border, Brentwood can be appreciated in any home.

- 1 Baroque
- 2 Clear Bevel
- 3 Bright Zinc, or Patina Caming
- 4 Granite

CASTILE

CAMING: PATINA
TRANSOM: AVAILABLE

Inspired by the historical Spanish kingdom, Castile is as ornate as its nature and history. The baroque style glass balances the intricacy of its centerpiece with a straight-lined, beveled border. Castile is the epitome of modern design.

- 1 Granite
- 2 Baroque
- 3 Patina Caming
- 4 Beveled

KENSINGTON

CAMING: PATINA
TRANSOM: AVAILABLE

Kensington brings a classic English atmosphere to anyone's curb appeal. A combination of frosted glass and subtle line patterns gives a high level of charm to this distinct beauty.

- 1 100 Water
- 2 Clear Bevel
- 3 Narrow Reed
- 4 Sandblasted Glass
- 5 Patina Caming

OXFORD

Although simple, Oxford's frosted glass with clear glass outlines adds an elegant touch. The luminous glass adds a high level of privacy. With a hint of modern dimension, any home can benefit from its polished appearance.

- 1 Clear
- 2 Satin Etch

SOLUTION DOORLITE SERIES

Clean lines, a straightforward design, these are the features that make Shaker doors timeless. A door that adds effortless style to any home needs a frame and glass to complement its unique features. The Solution series doorlites feature a low-profile, flat frame and patterned glass that was created to complement the clean, simple designs of our Shaker and flush doors.

The Solution Doorlite Series is available in various sizes, which makes it easy to create and customize an infinite number of contemporary looks. The screwless design eliminates holes and plugs and saves valuable time in installation as a traditional screw frame requires extra time to install screws and plugs. The frame features a patented interlocking joint and compression seal that adheres to the door and creates a powerful compression seal and bond. It safely locks decorative glass in place, while beautifully illuminating and bringing out the features of the glass. Its versatility matches many styles, such as Modern, Craftsman, Mid-Century, and so many more. There are no screw holes, is built to resist warping, and is available in a textured vertical grain pattern in both white and tan.

FEATURES & BENEFITS

- No unsightly plugs or screw holes.
- Available in white or tan.
- Textured vertical grain pattern.
- Matches various architectural styles.
- Shaker style low profile.
- Patented frame system.
- Built to resist warping.
- Easy Installation saving labor cost.

RUSTIC SERIES

Rustic Series • DRA1P

RUSTIC GRAIN

Our line of Rustic Doors were designed to provide classic charm, while bringing traditional, upscale appeal to any home. Doors in the Rustic Series display vertical planks, distinct panel details, and arched and radius tops. The Rustic Series only uses wrought iron glass and rustic accessories to reinforce that mid-century rustic look.

SPEAKEASY & HINGE STRAP

The Open Speakeasy adds an eclectic, but polished, flair to a Plastpro Rustic Series door. The simple, wrought iron bars add a bold, black detail to the door for a custom, antique look. Plastpro’s Hinge Straps are the perfect, low-maintenance way to style your Rustic Series door. The durable, aluminum material is resistant to rust and discoloration, keeping the bold, black pop of detail intact.

This model complies with ADA standards and can accommodate ADA required hardware for easy operation. Reinforced blocking and closures allow the following flexible hardware to be installed: panic bars, reinforced arm closures, and exit rim devices. These devices are easy to grasp with one hand and don't require tight grasping or twisting to operate.

FIR GRAIN

SMOOTH FINISH

BRUSHED SMOOTH FINISH

The Nova series features glass that is directly glazed into the door to create a seamless blend between the glass and door. The large pane glass allows the greatest views and amount of light into your home, brightening up the space and filling it with energy. Nova comes in two models: the 45 with a traditional, Craftsman sticking and the 90 with a modern, shaker sticking. The 45 is available in Smooth and Fir grain. The 90 is available in a brushed smooth skin finish.

Plastpro's SDL Kits are pre-cut to size and can be placed directly on the interior and exterior sides of the door for an easy installation. The composite material prevents rot and maintains the weatherproof integrity of a Plastpro door, making the SDL bars a low-maintenance addition. Available in fir and smooth finishes, with five classic configuration options to choose from in 6'8" and six in 8'0".

NOVA SERIES

NOVA 90

FULL LITE DIRECT GLAZED

BRUSHED SMOOTH FINISH

GLASS OPTIONS

● HVHZ IMPACT AVAILABLE ● IN STOCK ● EXTENDED LEAD TIME

FEATURES & BENEFITS

- 1 COMPOSITE STILE CAP
- 2 FULL LENGTH LVL *(Hinge & Strike side, for extra rigidity)*
- 3 WOOD BLOCKING *(For structural support)*
- 4 STEEL BEAM *(Hinge & Strike side, for extra rigidity)*
- 5 INSULATED 1" GLASS
- 6 COMPRESSION MOLDED FIBERGLASS SKIN
- 7 BRUSH FINISHED TEXTURE
- 8 INTEGRALLY MOLDED GLASS STOP
- 9 HIGH DENSITY POLYURETHANE FOAM
- 10 ADA COMPLIANT BOTTOM RAIL
- 11 COMPOSITE BOTTOM RAIL

STAIN KIT & STAINING GUIDES

Plastpro Stain Kit is an easy way to stain your fiberglass door exactly how you want for your home.

We've created easy step-by-step directions using our stain kit to make staining your door a breeze. These staining instructions were created for staining our oak, rustic, fir, cherry, and mahogany skin series.

Our kit is designed exclusively for Plastpro fiberglass entry doors.

STAIN KIT

Plastpro Stain Kit contains everything you need to stain one prehung door and two sidelites, or one double door unit.

BENEFITS & ADVANTAGES

- Protects the door from the sun, UV rays, and harsh winter weather.
- Faster drying time with environmentally friendly water based top coat. Easy to apply
- Special formula with long lasting vibrant colors.

BOX CONTAINS

- Zar® Exterior Water Base Polyurethane (qt)
- Zar® Wood Stain (pt)
- Mineral Spirits (4 oz.)
- Two 2" Foam Brushes
- One 2.5" Synthetic Bristle Brush
- Cheese Cloths
- Two Stir Sticks
- One Pair of Latex Gloves
- Door Staining Instructions
- Two Skin Samples

LIMITED
5-YEAR
FINISH
WARRANTY

STAIN COLOR OPTIONS

The kit comes in seven different stain variations. Depending on your desired shade, you may need to apply the stain more than once for a darker finish. *Actual stain color may vary. To achieve the best results, test on the skin sample first.

Colors shown have one coat of stain.

MATERIALS NEEDED

PLASTPRO'S PRE-FINISH KIT OR:

- | | |
|---------------------------------|---------------------------|
| A. Pre-Mixed Stain (1/2 pint) | F. 3" China Bristle Brush |
| B. Mineral Spirits (4 fl. oz.) | G. Two Stir Sticks |
| C. Top Coat/Sealer (20 fl. oz.) | H. Two Skin Samples |
| D. Two Clean Cloth | I. Finishing Instruction |
| E. One Pair Protective Gloves | |

STAINING INSTRUCTIONS FOR GRAINED DOORS & PF™ DOOR FRAMES

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.
2. Remove all the hardware and mask off anything you don't want stained such as the glass insert.
3. DO NOT SAND GRAINED FIBERGLASS / PF™ DOOR FRAMES
4. Wipe the Door / PF™ Door Frame with mineral spirits to clean any dust or residue from the surface. Allow door surface to dry completely before applying stain.

STEP 2: STAIN APPLICATION

1. Starting at the center of the Door / PF™ Door Frame, stain one to two panels at a time. Apply stain with a 3" to 4" soft bristle brush, or rag. Apply enough stain to fill the Door / PF™ Door Frame grain.
2. With a clean, lint free 24" x 24" cloth, softly wipe the surface until you reach your desired tone. TIP: When the rag becomes saturated with stain, refold to work with a less saturated section. Be sure to use the same rag for the whole Door / PF™ Door Frame.
3. After all stain is brushed evenly, you may add finishing touches by using a small 1" to 2" brush or cotton swabs.
4. (If desired) Allow the Door / PF™ Door Frame to dry for at least 48 hours before applying another coat. Then, repeat above process.

STEP 3: PROTECTIVE TOP COAT

Application of polyurethane top coat with UV inhibitors like ZAR™ Exterior polyurethane, Wood Kote® Flagship UV, or Minwax® Fast Drying Polyurethane for exterior applications.

1. After stain has completely dried (48 hours), mix the top coat well and apply evenly using a clean dry 2" soft bristle brush or 3" foam brush. Be sure to stop when the grain changes direction.
2. Apply two or three coats of finish, allowing at least 24 hours of drying time between each application.

IMPORTANT TO NOTE:

- It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.
- Staining instructions are for Oil-Based, Premium Quality Wood Stains or similar product designed for use on a fiberglass surface. Please note the instructions indicated are specific to the Zar brand stain included in our stain kit. Please reference stain manufacturers instructions before applying any stain.

MATERIALS NEEDED

- A. Lint-free cloth
- B. Mineral Spirits
- C. Rubber gloves
- D. Masking tape
- E. 4" Bristle Brush
- F. For Water-based Application: Acrylic-based primer*/ acrylic latex-based exterior grade paint.

We recommend using Sherwin-Williams PrepRite® Bonding Primer with compatible acrylic-latex paint for optimal paint adhesion.

PAINTING INSTRUCTIONS FOR OAK GRAIN DOORS

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.
2. Remove all the hardware and mask off anything you don't want painted, such as the glass insert.
3. DO NOT SAND GRAINED FIBERGLASS.
4. Wipe the door with mineral spirits to clean any dust or residue from the surface. Allow door surface to dry completely before applying stain paint. Do not use hydro-carbon based solvents to clean the surface as such products may leave a residue.
5. Apply primer with a 4" brush beginning with the panels. Follow the manufacturer's instructions for drying time before applying topcoat. Continue to apply the prime to ALL 6 sides. Doors which have been bored and mortised for hardware should be primed inside of the lock bore as well.
6. The primer must be completely dry before applying the topcoat.

STEP 2: PAINTING

1. Apply exterior grade paint with 4" brush beginning with the panels.
2. It is common practice to paint both stiles the same color as the exterior side of the door. If applying a second coat, follow the manufacturer's instructions for drying time between coats.
3. Continue to apply the top coat to ALL 6 sides of the door which have been bored and mortised for hardware should be finished inside of the lock bore as well.

CAUTION

1. 1. When using stains, mineral spirits, paints, or other hazardous materials, always read and follow the manufacturer's instructions. Plastpro, Inc. makes no representations as to the proper use of other manufacturers' products.
2. When working with paints or solvents, make sure the working area is well ventilated.
3. Keep away from heat and flame as materials may be combustible.
4. Paints or solvents may cause skin and eye irritation. Avoid contact with skin and eyes.
5. Keep out of reach of children.

IMPORTANT TO NOTE:

- It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.

MATERIALS NEEDED

- A. Lint-free Cloth
- B. Mineral Spirits
- C. Rubber Gloves
- D. Masking Tape
- E. 4" Bristle Brush

F. For Water-based Application: Acrylic-based primer* / acrylic latex-based exterior grade paint.

G. Scotch Brite Pad (Fine) or 320-400 grit sandpaper

(For Smooth Doors Only)

We recommend using Sherwin-Williams PrepRite® Bonding Primer with compatible acrylic-latex paint for optimal paint adhesion.

PAINTING INSTRUCTIONS FOR DOORS & PF™ DOOR FRAMES

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.
2. Remove all the hardware and mask off anything you don't want painted, such as the glass insert.
3. **Smooth Doors only.** Lightly scuff sand the surface with a Scotch Brite pad or fine sand paper. **DO NOT SAND GRAINED FIBERGLASS.**
4. Wipe the door with mineral spirits to clean any dust or residue from the surface. Allow acetone to dry from the surface before applying.
5. Do not use hydro-carbon based solvents to clean the surface as such products may leave a residue.
6. Apply primer with a 4" brush beginning with the panels. Follow the manufacturer's instructions for drying time before applying topcoat. Continue to apply the prime to ALL 6 sides. Doors / PF™ Door Frames which have been bored and mortised, or machined for hardware should be primed inside of the lock bore, or prepped area as well.
7. The primer must be completely dry before applying the topcoat.

STEP 2: PAINTING

1. Apply exterior grade paint with 4" brush beginning with the panels.
2. It is a common practice to paint both door stiles, or both PF™ Door Frame sides, the same color as the exterior side of the door. If applying a second coat, follow the manufacturer's instructions for drying time between coats.
3. Continue to apply the top coat to ALL 6 sides of the door which have been bored and mortised for hardware should be finished inside of the lock bore as well.

CAUTION

1. When using stains, mineral spirits, paints, or other hazardous materials, always read and follow the manufacturer's instructions. Plastpro Inc. makes no representations as to the proper use of other manufacturers' products.
2. When working with paints or solvents, make sure the working area is well ventilated.
3. Keep away from heat and flame as materials may be combustible.
4. Paints or solvents may cause skin and eye irritation. Avoid contact with skin and eyes.
5. Keep out of reach of children.

IMPORTANT TO NOTE:

- It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.

TESTING RESULTS

ASTM D1761	Screw holding capacity.
NWWDA TM-7	Cycle slam test.
NWWDA TM-8	Hinge load resistance test.
ASTM E 283	Air infiltration.
ASTM E 331 / E 547	Water resistant.
ASTM E 330	Uniform structural load.
ASTM E1886 / E1996	Impact / cycle test.
AAMA 1304	Forced entry resistance test.
TAS 201	Impact test.
TAS 202	Air / water / structural test.
TAS 203	Wind pressure cycle test.
NFRC 100 / 200 / 500	Energy efficiency.
ASTEM E90 / STC / OITC	Sound transmission.
ULC 10 C / NFPA 252 / ASTM E 2074	Fire rated.
CDPH / EHLB METHOD V1.1 2010	Volatile organic chemical emission test.
JIS Z 2801:2001	Antimicrobial products test.
ASTM D1413-07	Antifungal wood plastic composite test.
CSFM 12-7A-1	Exterior wildfire exposure test.
AAMA 1702	Exterior door test for manufactured housing.
AAMA 920	Operating cycle test.
AAMA / WDMA / CSA 101 / I.S./A440 (NAFS)	North America fenestration test.

The PLASTPRO DOOR met requirements for sawing, planing, routing, boring, drilling and chiseling. For more specific results, please see our website at www.plastproinc.com or contact our Customer Service Department at 1 (800) 779-0561.

WARNING: These products may include styrene, titanium dioxide and wood dust, which are known to the State of California to cause cancer. For more information go to www.p65warnings.ca.gov
