

2025 EXTERIOR IMPACT CATALOG

BHI Doors
SINCE 1963

bhiflorida.com

Quality components create the total package.

The BHI Doors system is a collection of best-in-class components (doors, doorglass, frames, astragals, weather seals, thresholds, locksets, and hardware) used to create entryways with enduring good looks and superior performance. The majority of our door systems are tested to the HVHZ (High Velocity Hurricane Zone) standards, the most stringent hurricane codes anywhere in the United States. Most BHI Door Systems meet the minimum Florida Energy code standards.

Great craftsmanship, beautiful glass patterns, multiple component finish options, superior construction, and energy-saving features all come together in a wide range of entry systems that enhance the value of your home and add beauty to everyday living.

BHIDoors *Commitment*

All products featured are in stock, ready to be built- unless marked as special order.

Unless otherwise noted, all products featured can be built into door systems that are compliant with hurricane structural, hurricane impact and the latest energy codes.

BHI Doors continues our commitment to service excellence as we bring enduring beauty and value to exterior doors throughout Florida. – Established in 1963.

THE BHI SYSTEM

Add beauty to and increase the value of your home with ODL's innovative line of doorglass.

FIBERGLASS DOORS AND PF FRAMES™

A lifetime of exceptional durability and performance for every door around your home.

CUSTOM GLASS

Custom glass for doors, sidelites, windows and transoms.

THRESHOLDS & ASTRAGALS

For additional security and weather protection our systems use DLP thresholds and astragals.

DOOR ACCESSORIES

Give your door more character by adding dentil shelves and clavos.

RESIDENTIAL HARDWARE

Easy installation and secure performance.

SECURITY PLATES

A simple innovation for a more secure entry door!

VENTILATING DOORS

Let in the breeze without compromising security with an optional window insert in your door (with a security screen).

BHI Weather-seals

Keep cool air in and keep bugs out while benefiting from improved energy efficiency.

BHI Hinges

Specially designed for high-performance and tested for long lasting endurance.

RESIDENTIAL LOCKSETS

Superior functionality and long lasting beauty.

BHI STANDARDS

Sustainability

Your BHI entry system will be built to stand the test of time in Florida's often unforgiving climate. We strive to use as many eco-friendly and energy efficient components as possible to preserve the environment and help lower your energy bills.

- Entirely composite frames
- Insulated fiberglass doors
- High quality weatherstripping
- Low-E +366 & turtle glass options

Accessibility

Our system can be built to help you and your loved ones easily access your home. We carry multiple A.D.A. compliant components specifically designed with ease of use in mind.

- A.D.A. slabs
- Ball bearing hinges
- Spring hinges
- Code approved pet doors
- Touchscreen deadbolts

Security

The same added strength that helps impact products protect your home from hurricanes, can also help protect your home from intrusion. In addition, your BHI entry system has many other component and hardware options designed to give you peace of mind.

- Impact slabs & glass
- T-Rex security plates
- Safety tab hinges
- Privacy glass
- Astragal security strips

Appeal

Enhance the beauty of your home with our wide variety of art glass options from 5 different design families. Whatever your home's aesthetic is, we've got the entry system you need to make an even bigger impression.

- Camed art glass
- Multiple skin texture options
- Custom glass designs
- Paintable/stainable components

While BHI stocks components needed to build many of the entry systems shown in this catalog, not all combinations of options are available in all unit widths. For more information, consult the availability guide in the back.

CUSTOM GLASS

Camed Designs

Caming is the thin metal work that joins together the door glass elements. Camed units are available as custom one-of-a-kind or complementary of any designs.

Metalist Designs

Our Metalist designs are composed of aluminum sheets cut to a design or style of your choice, and sandwiched between insulated glass. Metalist units are available from existing designs, as custom one-of-a-kind or complementary of any designs.

AROUND THE HOME

Solar Gray

Thousands of marine turtles nest in U.S. coastal areas. State and local ordinances protect hatchling turtles by limiting the brightness of inside-to-outside visible light transmittance.

All Solar Gray glass designs shown below have been constructed to meet those local standards.

Turtle Code Glass is Solar Gray - Solar Gray (SGSG).

T-REX

Security Plate Installation

**A simple innovation for more secure
entry doors!**

T-Rex security plates are an extremely cost-effective way to take your BHI Doors entry system from tough and secure to tyrannically strong.

The kit for single door systems involves two small plates that are easily installed under the deadbolt latch plate on the edge of the door, and one larger plate that gets installed on the outside of the latch jamb around the deadbolt bore. When combined, the plates work together to ensure our entry system stands up against forced entry more effectively than units built with the most popular multi-point locking mechanisms- all without the heavy coast, regular maintenance, and performance issues that are often associated with those multi-point systems.

These plates also work effectively on BHI double door systems, as we combine the added strength of the two deadbolt security plates on the active door, with the rigidity of our aluminum t-astragal on the inactive door.

GUIDE**

APPROVALS, SPECS & COMPONENTS

HURRICANE CODE COMPLIANCE

Our expertise in Florida building codes means you can trust your BHI Doors system to comply with the unique requirements needed for state and local standards.

Impact units have structural ratings and may be used in the HVHZ and/or WBD impact zones without shutters required.

= HVHZ STRUCTURAL
& IMPACT RATED

= Florida Wind-Borne
Debris (WBD) STRUCTURAL
& IMPACT RATED

HURRICANE CODE COMPLIANCE

Doors made to withstand high pressure

BHI quotes and order acknowledgments list the product approvals needed for each pre-hung door system.

Some doors are approved for HVHZ for in-swing application but may have overhang requirements. Some systems with very high design pressure ratings may require surface bolts, and/or dead bolt security strikes.

BHI does not warrant the suitability of any product for any specific use. For additional code information, contact a BHI representative, speak with a local plans examiner's office, or contact a contractor or engineer.

ENERGY CODE COMPLIANCE

ENERGY COMPLIANCE

BHI and our suppliers of major fenestration components have made it a joint effort to focus on compliance with the Florida Building Code - 5th Edition Energy Conservation.

Catalog pages containing only product that meet the minimum energy standard for both solar heat gain coefficient (SHGC) and U-Factor in both climate zones will display this logo at the top of the page:

Individual products that DO NOT meet the minimum energy standards will display this logo:

Individual products that DO meet the minimum energy standards will display this logo:

Full Lite 6/8
DRS00-JA

3/4 Lite Over 1 Panel 6/8
DRG29-JA

ENERGY CODE EXEMPTIONS

 There are also exemptions for products that DO NOT meet the energy standards.

The Prescriptive method of compliance allows up to 15 square feet "of glazed fenestration" per dwelling unit to be exempt from the U-factor and SHGC requirements R402.1.(1), and also one side hinged opaque door assembly up to 24 square feet to be exempt from U-factors (Section R402.1.(3 & .4)). If using this exemption, doors bearing this mark  may be used as single door units. Other exemptions for doors bearing that mark may be used when using whole house energy engineering compliance method.

Florida Energy Efficiency Requirements

Climate Zone 1		
	Impact	Non-Imp
Fenestration U-Factor	≤ .75	≤ .65
Glazed Fenestration SHGC	≤ .25	≤ .25

Climate Zone 2		
	Impact	Non-Imp
Fenestration U-Factor	≤ .65	≤ .40
Glazed Fenestration SHGC	≤ .25	≤ .25

ENERGY CODE COMPLIANCE

BHI and its suppliers of major components are Energy Star Partners.

ENERGY LABELING

Labels will have specific certified products directory (CPD) numbers listed. These are the numbers listed in the certified products directory of the National Fenestration Rating Council (NFRC). The CPD numbers listed under BHI are also listed with our third-party quality assurance provider, National Accreditation Management Institute (NAMI) for thermal quality assurance compliance.

BHI doors that meet the Energy Standards will have at least 2 Energy Performance labels.

- One permanent label attached to the hinge side of the door slab.
- One temporary label which will be attached to the face of the door.

STRUCTURAL CERTIFICATION LABELING

Builders Hardware inc.
Plastpro/Nanya Plastic FL# 15210.4
MANUFACTURER STIPULATES CONFORMANCE TO:
TAS 201,202,203 - ASTM E48 NOA 17-0712.05/16-0314.11
DP RATING +75-75 PSF 1/8", 1/2", 1" GLAZED UNIT IN/OUT
MAX TEST SIZE 3/0 X 6/8 X
FL CERT # 1773 ANSI # 0651

Specific Labels are used when exact design pressure ratings are required for specific size door configurations, within our test matrix qualifications. Structural Certification Labels are created for specific units with specific stipulations which conform to varying codes within the state.

BHI does not warrant the suitability of any product for any specific use. For additional code information, contact a BHI representative, speak with a local plans examiner's office, or contact a contractor or engineer.

STANDARD FEATURES

ALL SMOOTH WHITE SKIN SYSTEMS INCLUDE:

- Smooth grained fiberglass doors
- Smooth white 4-9/16" composite door frames
- White, bronze, or black weather seals
- Aluminum threshold in mill, bronze, or black finish
- Round corner ball-bearing safety stud hinges in stainless steel, bronze, or black finish
- For double doors: flat profile aluminum t-astragal in powder coat white finish or tan paintable primer

STANDARD FEATURES

ALL TEXTURED TAN SKIN SYSTEMS INCLUDE:

- Textured woodgrained fiberglass doors
- Textured tan 4-9/16" composite door frames
- White, bronze, or black weather seals
- Aluminum threshold in mill, bronze, or black finish
- Round corner ball-bearing safety stud hinges in stainless steel, bronze, or black finish
- For double doors: flat profile aluminum t-astragal in powder coat white finish or tan paintable primer

Textured oak grain

(Also available in fir, teak, and rustic grain)

Tan paintable aluminum
t-astragal

Bronze weather-strip

Textured tan composite door frames

Radius x radius
security hinges

Inswing threshold mill finish
(Also available in outswing)

COMPONENTS

Door Frames

Our rigid composite formulation door jamb offers the very best in product performance, and is easy to use. These innovative frames can be machined like wood, look and feel like wood, and can be painted or stained. The noticeable difference comes down to the strength and durability.

The closed cellular structure of our composite frames ensures that the molding will not absorb moisture, and that the frame will resist splitting, rotting and insect damage.

COMPONENTS

Astragals

BHI's aluminum exterior astragals offer increased security. They are true standouts in regards to passing Florida building code testing with a double door unit.

- Available in white painted or tan primed
- Available in flat or contoured profiles
- Available in 6/8, 7/0 and 8/0 sizes

Adaptability

4-way adjustable (horizontal and vertical) strike latch plates.

Security

Flip lever locks

Precision

Slide bolt with machined center punch allows for precise bolt location and ease of installation.

COMPONENTS

Thresholds

Keep the bugs out and the air in with our aluminum thresholds with composite backer. Available for inswing, outswing and ADA applications. Available in mill, black or bronze finish.

Sizes: 4-9/16, (extenders for 5-1/4, 6-9/16, 7-1/4)

INSWING

OUTSWING

OUTSWING HVHZ

Weather Seals

BHI Weather seals are the real deal. Our weatherstrip is available in 650 & 825 reach. Both our weatherstrip and sweeps are available in white, black or bronze.

AVAILABILITY GUIDE

This Availability Guide can be used to determine if the door system you want can be built in the Width you need as recommended for your specific region's structural and impact testing standards. Each row indicates one combination of Design, Height, Slab/ Glazing Build, Configuration and Skin Type Options. You will be able to see what Unit Widths are available for that combination in each region off to the right.

WBD = Unit Widths that can only be built as recommended for Wind Borne Debris region standards.

HVHZ = Unit Widths that can only be built as recommended for the tougher High Velocity Hurricane Zone region standards.

BOTH = Units Widths that can be built as recommended to meet either Region's standards. You will need to specify which Region you wish to have this built for when ordering these. Units that meet HVHZ standards will also meet the WBD standards, but could cost more as they use some components manufactured with added reinforcements.

Please provide the Unit Code Prefix for your selection when placing your order. If choosing an option with availability for both regions, you'll need to specify WBD or HVHZ in your order as well.

THE SDL BAR AVAILABILITY SHOWN BELOW ASSUMES THEY ARE APPLIED TO A FULL LITE IMPACT INSERT INSTALLED INTO THE DOOR SLAB.															
DIFFUSED WHITE PRIVACY, RAIN GLASS, AND CLEAR GLASS OPTIONS ARE AVAILABLE IN ALL UNIT WIDTHS SPECIFIED BELOW.															
SDL BARS CAN ALSO BE INSTALLED ON DIRECT GLAZED SLABS, PLEASE REFER TO THE DIRECT GLAZED SECTION FOR THEIR AVAILABILITY.
